Relevant Coursework: Theoretical Foundations of CS, Multivariate Calculus, Linear Algebra, Probability & Stats for CS, Data Structures

TECHNICAL SKILLS

Computer Languages: Python, R, SQL, HTML, CSS
Software/Systems: Tableau, Visual Studio IDE

PROJECTS

Analysis of Online Sales Data   *April 2023*
- Utilized a data set obtained from Kaggle.com to analyze trends from the online sales data of a retailer in the year 2021 using the Visual Studio IDE
- Applied the "pandas" library to interpret over one hundred thousand data points
- Displayed said data using the matplotlib library to concise findings to bar graph format

Portfolio Website   *September 2024*
- Using HTML, CSS, and some JavaScript, I developed a personal website containing all my professional information including "about", "project", and "contact me" sections
- Hosted on GitHub and deployed using Netlify

WORK EXPERIENCE

Chick-fil-A   Conyers, Georgia
Certified Trainer   *July 2021 – Present*
- Proficiently managed guest complaints, relieved pressure from Shift Leads, and provided effective leadership to fellow team members, fostering a positive and collaborative work environment.
- Mentored and guided new hires to ensure their successful integration into the team, setting a precedent for excellence and dedication.

EXTRACURRICULAR

Amazon FBA and FBM Seller   *July 2023 – Present*
- Operated Amazon's FBA and FBM programs to accrue over $20,000 in sales for the online business that I own and operate, *Last World LLC*
- Dedicate around 20 hours per week researching, packaging, and shipping off merchandise and products to customers and Amazon fulfillment centers

Peer Mentorship   *Fall 2023*
- Provided guidance and support to fellow student in their College Algebra course, helping them learn basic concepts, complete homework, and study for any major exams
- Raised student's grade from a C to an A- throughout our sessions
- Met once a week for one to two hours starting the third week of the semester
